I INTRODUCTION

A. RISK FACTORS

STANDARD RISK FACTORS:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuate, the value of your investment in the scheme may go up or down.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme.
- LIC NOMURA MF Bond is the name of the scheme does not in any manner indicate either the quality of the scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of Rs 2 Crore made by it towards setting up the Fund.
- The LIC NOMURA MF Bond scheme is not a guaranteed or assured return scheme.

RISK FACTORS SPECIFIC TO SCHEME:

. The scheme is an open-ended debt scheme.

The value in the investments is bound to change with changes in the factors affecting the market viz. changes in interest rates, exchange rates, price and volume fluctuations in debt markets, taxation, govt. policies, and other economic and political developments

The Scheme proposes to invest a major part of its portfolio in debt and money market. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities.

The Scheme may also invest in overseas financial assets subject to necessary approvals from the concerned regulatory authorities in India within the investment objectives of the scheme. To the extent that the assets of the Scheme are invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.

All debt securities are exposed to interest rate risks, credit risks and reinvestment risk.

The scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by SEBI, in an attempt to protect the value of the portfolio and enhance Unit holders interest. In case the scheme utilizes any derivatives under the regulations, the scheme may, in certain situations, be exposed to instrument specific risks. For details please refer to the Para on Derivatives.

Liquidity of scheme's investment may be inherently restricted by trading volumes and settlement periods. The inability to sell the money market or debt securities held in the scheme's portfolio due to the absence of a well developed and liquid secondary market for such securities may result, at times in losses to the scheme, in case of subsequent decline in the value of such securities.

The prices of securities may be affected by the time taken by the Fund for redemption of units, which could be significant in the event of receipt of a very large number of redemption requests or very large value of redemption requests. The liquidity of the assets may be affected by other factors such as general market conditions, political events, bank holidays and civil strife. In view of this, the Trustee has the right in its sole discretion to limit redemption (including suspension of redemption) under certain circumstances. Please refer to the Para "Suspension of Redemption/Repurchase of units" for details. Redemption due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustee, AMC, Mutual Fund, their directors or their employees shall not be liable for any such tax consequences that may arise.

Income / growth appreciation indicated herein this document are subject to tax laws in force for the time being. The tax benefits described herein this Scheme Information Document are as available under the present taxation laws with no guarantee whatsoever on the period for which they may be prevalent, and are available subject to conditions. The information given is included for general purpose only and the Unit holders should be aware that the relevant fiscal rules or their interpretation may change. In view of the individual nature of tax consequences, each Unit holder is advised to consult his/ her own tax advisor.

Investors in the Scheme are not being offered any guaranteed returns. The Fund/AMC is also not assuring or guaranteeing that it will be able to make regular dividend distributions to its Unit holders, though, it has every intention to manage the portfolio so as to make such payments to the Unit holders. Dividend payments will be dependent on the returns achieved by the AMC through active management of the portfolio. Further, it should

be noted that the actual distribution of dividends and frequency thereof are indicative and will depend, inter-alia, on availability of distributable surplus. Dividend payouts will be entirely at the discretion of Trustees.

As per SEBI Circular SEBI/IMD/CIR No. 10/22701/03 dated December 13, 2003, the scheme / plan shall have minimum 20 investors and no single investor shall account for more than 25% of the corpus of the scheme on quarterly basis. In case of non fulfillment with either of the above two conditions in a three months time period or at the end of succeeding calendar quarter, whichever is earlier, from the close of the IPO of open ended schemes or on an ongoing basis of each calendar quarter, the schemes/plans shall be wound up by following the guidelines prescribed by SEBI and the investors' money would be redeemed at applicable NAV.

Government policy regarding implementation of international treaties like WTO etc. could affect the fortunes of many of the related companies where the scheme may invest.

Imposition of tariff / non - tariff barriers and restrictions on labour by countries in the target markets may impact corporate earnings.

A number of companies in the technology sector generate revenues in foreign currencies and may have investments or expenses also denominated in foreign currencies. Changes in exchange rates may, therefore, have a positive or negative impact on companies in the said sector.

Risk associated with investment in derivative instruments: The Scheme may invest in derivative instruments. The derivatives will entail a counter-party risk to the extent of amount that can become due from the party. The cost of hedge can be higher than adverse impact of market movements. An exposure to derivatives in excess of the hedging requirements can lead to losses. An exposure to derivatives can also limit the profits from a genuine investment transaction. Efficiency of a derivatives market depends on the development of a liquid and efficient market for underlying securities and also on the suitable and acceptable benchmarks.

Risk associated with investment in debt securities: All debt securities are exposed to interest rate risks, credit risks and reinvestment risk. Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern e.g. corporate bonds carries a higher amount of risk than government securities. Further even among corporate bonds, bond which AAA rated are comparatively less risky than bonds that are AA rated.

Liquidity of scheme's investment may be inherently restricted by trading volumes and settlement periods. The inability to sell the money market or debt securities held in the scheme's portfolio due to the absence of a well developed and liquid secondary market for such securities may result, at times in losses to the scheme, in case of subsequent decline in the value of such securities.

Risk associated with floating rate securities: The fund may invest in floating rate instruments. These instruments' coupon will be reset periodically in line with the benchmark index movement. The changes in the prevailing rates of interest will affect the value of the Plan's holdings and thus the value of the Plan's Units. The fund could be exposed to the interest rate risk (i) to the extent of time gap in resetting of the benchmark rates, and (ii) to the extent the benchmark index fails to capture the interest rate movement. Though the basis (i.e. benchmark) gets readjusted on a regular basis, the spread (i.e. markup) over benchmark remains constant. This can result in some volatility to the holding period return of floating rate instruments. If the floating rate asset is created by swapping the fixed return to a floating rate return then there may be an additional risk of counter-party who will pay floating rate return and receive fixed rate return. Due to the evolving nature of the floating rate market, there may be an increased degree of liquidity risk in the portfolio from time to time.

Risk associated with overseas financial assets: The Scheme may also invest in overseas financial assets subject to necessary approvals from the concerned regulatory authorities in India within the investment objectives of the scheme. To the extent that the assets of the Scheme are invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of

capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.-2h

Risks Associated with investments in foreign securities: The schemes may also invest in ADRs/GDRs and other foreign securities as permitted by RBI and SEBI. To the extent that some part of the assets of the scheme may be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by the changes in value of certain foreign currencies relative to the Indian rupee. The repatriation of capital also may be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.

Risk factors related to securitized debt: Different types of Securitized Debts in which the scheme would invest carry different levels and types of risks. Accordingly the scheme's risk may increase or decrease depending upon its investments in Securitized Debts e.g. AAA securitized bonds will have low Credit Risk than a AA securitized bond. Credit Risk on Securitized Bonds may also depend upon the Originator, if the bonds are issued with Recourse to Originator. A bond with Recourse will have a lower Credit Risk than a bond without Recourse. Underlying assets in Securitized Debt may be the receivables from Auto Finance, Credit Cards, Home Loans or any such receipts. Credit risk relating to these types of receivables depends upon various factors including macro-economic factors of these industries and economies. To be more specific, factors like nature and adequacy of property mortgaged against these borrowings, loan agreement, mortgage deed in case of Home Loan, adequacy of documentation in case of Auto Finance and Home Loan, capacity of borrower to meet its obligation on borrowings in case of Credit Cards and intentions of the borrower to influence the risks relating to the assets (borrowings) underlying the Securitized Debts. Holders of Securitized Assets may have Low Credit Risk with Diversified Retail Base on Underlying Assets, especially when Securitized Assets are created by High Credit Rated Tranches. Risk profiles of Planned Amortization Class Tranches (PAC), Principal Only Class Tranches (PO) and Interest Only Class Tranches (IO) will also differ, depending upon the interest rate movement and Speed of Pre-payments. A change in market interest rates/prepayments may not change the absolute amount of receivables for the investors, but affects the reinvestment of the periodic cash flows that the investor receives in the securitized paper.

OTHERS:

All the points mentioned in the Standard Observations have been included in this Scheme Information Document.

This Scheme Information Document contains no deviations from, and neither have any subjective interpretations been applied to, the provisions of any regulations. All contents in this Scheme Information Document have been checked and are factually correct.

No person is authorized to give any information or to make any representation not consistent with this Scheme Information Document in connection with the issue of units of LIC NOMURA MF Bond fund.

Any information or representation contained herein this document must not be relied upon as having been authorized by the Mutual fund or the Investment manager.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by

any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

II. INFORMATION ABOUT THE SCHEME

A. TYPE OF THE SCHEME

An Open-ended debt scheme.

B. INVESTMENT OBJECTIVE

LIC NOMURA MF BOND FUND, an open-ended debt Scheme will endeavor to generate an attractive return for its investors by investing in a portfolio of quality debt securities and money market instruments.

C. ASSET ALLOCATION

Instruments	Approx. Allocation (%) of Corpus (under Normal Condition)	Deviation (%) (to normal allocation)	Risk Profile
Debt	60 – 100 %	30%	Low to Medium
Money mkt.	0 – 40 %	50%	Low

D. SCHEME INVESTMENT

The Scheme proposes to invest in a mix of fixed income securities including securitized debt, asset backed securities, corporate debentures, bonds & money market instruments for generating attractive return.

The Fund proposes to continuously monitor the potential for both debt and money market instruments to arrive at an optimum asset allocation between the asset classes.

The Scheme may invest in money markets instruments including call money market, or any other alternative permitted by Reserve Bank of India in lieu of Call money, term/notice money market and repos in order to meet the liquidity requirements or to meet the defensive nature the portfolio.

The Scheme may also invest in Govt. Securities, which may be those supported by the ability to borrow from the treasury; those with sovereign or state guarantee or those supported by the state govt. or the govt. of India in some other way.

The Fund may invest, subject to necessary approvals, in ADR's / GDR's of Indian Companies listed overseas. The Fund will employ necessary measures to manage foreign exchange movements arising out of such investments. The Fund may also invest in overseas securities with the approval of RBI/SEBI, subject to such guidelines as may be issued by RBI/SEBI.

The Fund may also use trading in derivatives for the purpose of hedging and portfolio balancing in accordance with SEBI regulations.

Changes in investment pattern:

Depending upon the market conditions, market opportunities available, the political and economic factors and subject to the Regulations, the percentage investments of the fund may vary at times, based on the perception of the Fund Manager within the overall investment objective of the scheme.

Investment of subscription money:

Pending deployment of funds of the scheme in securities in terms of investment objectives of the scheme, the AMC can invest the funds of the scheme in money market instruments. The income earned on such investments will be merged with the income of the scheme.

E. INVESTMENT STRATEGIES

Approach to investment in debt:

The investment in debt securities will usually be in instruments, which have been assigned as investment grade ratings by a recognized credit rating agency. In case a debt instrument is not rated, prior approval of Board of directors will be obtained for such investments. The Maturity profile of debt instruments will be selected in line with the outlook for the market. The investment strategy would emphasize investments in securities that give consistent returns at low levels of risks.

If the Scheme decides to invest in Securitized Debt and or Asset backed securities it is the intention of the investment manager that such investments will not normally exceed 30% of the corpus of the Scheme.

Trading in derivatives:

The Scheme may use derivatives with respect to debt in accordance with SEBI regulations in an attempt to protect the portfolio values and unit holder interest. The AMC in appropriate circumstances may use futures, options and other derivatives subject to applicable regulations and counter party risk assessment as and when they become permissible in the Indian markets subject to necessary authorization. In addition subject to applicable regulations and counter party risk assessment the scheme may also borrow or lend stock. The value of the derivative contracts outstanding will be limited to 20% of the net assets of the Scheme. Trading in derivatives shall however be restricted to hedging and portfolio balancing purposes as illustrated in the following cases:

Debt Market Derivatives:

The deregulation of interest rates has resulted in presenting an assortment of risks to market participants. To provide an effective hedge against interest rate risks on account of lending or borrowings made at fixed/variable rates of interest, RBI has allowed the use of such instruments as the Interest Rate swaps (IRS) and Forward Rate Agreements (FRAs).

IRS: An IRS is an off balance sheet contract between two counterparties to exchange a stream of payments on specified dates based on a notional principal.

Presently the most common form of IRS in the domestic market is the Overnight Index Swap (OIS), wherein a fixed rate is exchanged with the floating leg linked to the MIBOR (Mumbai Interbank offered rate/ the call money rate). The tenure of the OIS ranges from 2 to 365 days.

E.g.: The scheme may park its funds in the call money market from time to time. The scheme thus becomes a lender in the market. Say Y - a corporate is a borrower in the call money market. Suppose the Fund manager of the scheme has a view that overnight rates may fall, while Y expects volatility and is looking to hedge or lock into a fixed rate. Now the scheme is a fixed rate receiver and Y is the floating rate receiver. Consider a 3 day OIS at 8.25% for a notional principal of Rs. 1 Crore between the two.

Now the scheme would receive a fixed rate from Y on the notional principal of Rs. 1 Crore@8.25% for 3 days = Rs. 6780/-.

The scheme in turn would have to pay Y the floating rate of interest on the same principal of Rs. 1 Crore, which is calculated as follows:

DAY	MIBOR PRINCIPAL (%)	INTEREST (Rs.)	AMOUNT (Rs.)
1	8.00	10000000	10002192
2	8.25	10002192	10004453
3	7.75	10004453	10006577
TOTAL		6577	

As shown in the table the scheme will be required to pay Y a sum of Rs. 6577/-.

Instead of exchanging the gross amounts Y will pay the scheme the difference amount i.e. 6780-6577= Rs. 203.

Thus at the end of the swap the scheme has earned a fixed rate while Y has been able to fix the cost of its funds irrespective of the movements in the market.

FRA(forward rate agreement): A FRA is a cash settled agreement where 2 parties (the buyer and the seller) agree to exchange interest payments for a notional principal amount for a specified period on a settlement date. A FRA is quoted by the forward month in which it matures, for e.g. A 3x6 FRA is a contract maturing 6 months from now and starting 3 months from now.

E.g.: Suppose the scheme has exposure to 91 day T Bills and the Fund manager takes a view that the yields are going to fall, then using FRAs he can lock into the available rates. Assume that on the last day of a given month the spot 91 day T Bill rate is 9.50% and the 3x6 FRA is quoted at 9.40%/9.60 %. Assuming a notional principal of 10 Crore the scheme now receives fixed 9.40% (and pays the 91 day T bill rate 3 months from now) on the 3x6 FRA for a notional principal of RS. 10 crore. On the settlement date the scheme receives the fixed rate from the swap market maker and pays the floating rate.

Assuming the fund manager's view is correct and the 91day T-Bill cut off, 3 months from now is 9.25% then the scheme receives - Rs.2343562 and pays Rs.2306164.The difference Rs.37397 is to be discounted to settlement at a mutually negotiated rate based on the credit of the counter-party.

Assuming a discounted rate of 10% the actual cash settlement = $37397 / (1+10\%)^{91/365}$ =Rs. 36488/-

RISKS:

Though these instruments are effective in removal of the interest rate risk they are still subject to

1. Counterparty risks i.e. default or delay in payment settlement, as well as
2. Market risks i.e. liquidity risk which is the ease with which a swap can be unwound or reversed, basis risk which is the risk of asset liability mismatch and price risk resulting from unexpected changes in the market value of the swap.

Risk control

The overall portfolio structuring will be aimed at controlling risk at a moderate level. Both very aggressive and very defensive postures would be avoided under normal market conditions. The risk would also be minimized through broad diversification of portfolio within the framework of the investment objectives of the scheme.

INVESTMENT BY LIC MONURA MF BOND FUND IN OTHER SCHEMES MANAGED BY THE AMC

LIC NOMURA MF BOND FUND may invest its funds with other schemes managed by LIC NOMURA MF AMC subject to regulations 44(1) of the SEBI Regulations 1996 and the AMC shall not charge any investment management fee for such investments.

PORTFOLIO TURNOVER:

Generally the AMC's Fund management encourages a low portfolio turnover rate. A high portfolio turnover may result in an increase in transaction, brokerage costs. However a high portfolio turnover may also be representative of the arising trading opportunities to enhance the total return of the portfolio.

F. FUNDAMENTAL ATTRIBUTES

D. COMPUTATION OF NAV

The Net Asset Value (NAV) per unit will be computed by dividing the net assets of the Scheme by the number of units outstanding on the valuation date.

The Fund will value its investments according to the valuation norms, as specified in Eighth Schedule of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

The Net Assets Value (NAV) per unit under the Scheme/Option shall be calculated as follows:

$$\text{NAV} = \frac{\text{Market or Fair Value of Scheme's Investments} + \text{Current Assets including accrued Income} - \text{Current Liabilities and Provisions including accrued expenses}}{\text{No. of Units outstanding under Scheme/ Option}}$$

The NAV shall be calculated up to four decimal places. However the AMC reserves the right to declare the NAVs up to additional decimal places as it deems appropriate. Separate NAV will be calculated and disclosed for each Option. The NAVs of the Growth Option and the Dividend Option will be different after the declaration of the first dividend.

The AMC will calculate and disclose the first NAV of the Scheme within a period of 5 business days from the date of allotment. Subsequently, the NAVs will be calculated for all the Calendar Days.

The NAV of the Scheme will be calculated upto 4 decimals..

Rounding off policy for NAV:

To ensure uniformity, the Mutual Fund shall round off NAVs up to two decimal places. However, the Mutual Fund can round off the NAVs up to more than two decimal places, if it so desires.

For this Scheme, NAV will be declared upto two decimal places & the second decimal will be rounded off to the next higher digit if the third decimal is or more than 5 i.e., if the NAV is 10.137 it will be rounded off to 10.14.

IV. FEES AND EXPENSES

This section outlines the expenses that will be charged to the scheme.

A. NEW FUND OFFER (NFO) EXPENSES

- a. Additional expenses upto 0.30 per cent of daily net assets of the concerned schemes of the Fund if new inflows from such cities as may be specified by Regulations from time to time are at least:
 - (i) 30 per cent of gross new inflows in the concerned scheme, or;
 - (ii) 15 per cent of the average assets under management (year to date) of the concerned scheme, whichever is higher.

Provided that if inflows from such cities is less than the higher of (i) or (ii) mentioned above, such expenses on daily net assets of the concerned scheme shall be charged on proportionate basis.

The additional expenses charged shall be utilised for distribution expenses incurred for bringing inflows from such cities. The additional expense charged to the scheme on account of inflows from such cities shall be credited back to the concerned scheme in case such inflows are redeemed within a period of one year from the date of investment.

- b. Brokerage and transaction costs which are incurred for the purpose of execution of trade and is included in the cost of investment, not exceeding 0.12 per cent in case of cash market transactions
- c. Additional expenses incurred towards different permissible heads, not exceeding 0.20 percent of daily net assets of the concerned scheme.

In Addition to expenses under Regulation 52 (6) and (6A), AMC may charge service tax on investment and advisory fees, expenses other than investment and advisory fees and brokerage and transaction cost as below:

- a. Service Tax on investment and advisory fees: AMC may charge service tax on investment and advisory fees of the scheme in addition to the maximum limit of TER as per the Regulation 52(6) and (6A).
- b. Service Tax on expenses other than investment and advisory fees: AMC may charge service tax on expenses other than investment and advisory fees of the scheme, if any within the maximum limit of TER as per the Regulation under 52(6) and (6A).
- c. Service Tax on brokerage and transaction cost: The service tax on brokerage and transaction costs

which are incurred for the purpose of execution of trade, will be within the limit of TER as per the Regulation 52(6) and (6A).

Further, it is clarified that the brokerage and transaction cost incurred for the purpose of execution of trade may be capitalized to the extent of 0.12 percent for cash market transactions. Any payment towards brokerage and transaction cost, over and above the said 12 bps cash market transactions may be charged to the scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under regulation 52 of the SEBI (MF) Regulations. Any expenditure in excess of the said prescribed limit (including brokerage and transaction cost, if any) shall be borne by the AMC or by the trustee or sponsors.

The AMC has estimated following recurring expenses, as summarized in the below table for each scheme. The expenses are estimated on a corpus size of INR 100 crores and have been made in good faith as per the information available to the AMC. The total expenses may be more or less than as specified in the table below. Expenses over and above the presently permitted regulatory limit will be borne by the AMC.
