INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

1. Investment in mutual fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk, including the possible loss of principal.
2. As the price/value/interest rates of the securities in which the scheme invest fluctuates, the value of your investment in the scheme may go up or down.
3. Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme.
4. The name of the scheme does not in any manner indicate either the quality of the scheme or its future prospects and returns.
5. The Sponsors are not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of Rs. 2 Crore made by it towards setting up the Mutual Fund.
6. The present scheme is not a guaranteed or assured return scheme.
7. The scheme would invest in Equity and Equity related instruments in line with the Investment objective of the scheme. Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity scheme unless they afford to take the risk of losing their investment.
8. Although it is intended to generate capital appreciation and maximize the returns by actively investing in equity / equity related securities and utilising debt and money market instruments as a defensive investment strategy, investors may note that AMC / Fund Manager's investment decisions may not be always profitable.

Schemes Specific Risk Factors

Different types of securities in which the Scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the Scheme's risk may increase or decrease depending upon its investment pattern.

1. RISKS ASSOCIATED WITH INVESTING IN EQUITIES AND EQUITY RELATED SECURITIES:

- a. **Market risk:** Any type of risk due to the market conditions and evolution, such as volatility in the capital markets, interest rates, changes in policies of the Government, taxation laws or any other political and economic development, which all

may negatively affect the prices of the securities invested in by the scheme.

- b. **Business risk:** Risk related to uncertainty of income caused by the nature of a company's business and having an impact on price fluctuations.
- c. **Liquidity risk:** This risk pertains to how saleable a security is in the market or the ease at which a security can be sold at or close to its' quoted or published price/value.

Securities that are listed on the stock exchange generally carry lower liquidity risk; the ability to sell these investments is limited by the overall trading volume on the stock exchanges.

2. RISKS ASSOCIATED WITH INVESTMENTS IN FIXED INCOME SECURITIES/BONDS

- a. **Interest Rate Risk:** This risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. Fixed income securities such as government bonds, corporate bonds, and money market instruments etc. run price-risk or interest-rate risk. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices generally increase. The extent of fall or rise in the prices depends upon factors such as coupon, maturity of the security, the yield level at which the security is being traded. The longer the time to a bond's maturity, the greater is its interest rate risk. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- b. **Re-investment Risk:** Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- c. **Liquidity Risk:** This risk pertains to how saleable a security is in the market or the ease at which a security can be sold at or close to its true value. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of some of the investments. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. The liquidity of debt securities may change, depending on market conditions. At the time of selling the security, the security can become less liquid (wider spread) or illiquid, leading to loss in value of the portfolio. Securities that are unlisted generally carry a higher liquidity risk compared to listed securities. Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring mark to market losses and losses when the security is finally sold.

Liquidity risk is greater for thinly traded securities, lower-rated bonds, bonds that were part of a smaller issue, bonds that have recently had their credit rating downgraded or bonds sold by an infrequent issuer. Bonds are generally the most liquid during the period right after issuance when the bond typically has the highest trading volume.

- d. **Credit Risk/ Default Risk:** Credit risk is the risk that the issuer of a debenture/ bond or a money market instrument may default on interest and /or principal payment obligations and/or on violation of covenant(s) and/or delay in scheduled payment(s). Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer.

Government Security is a sovereign security and the default risk is considered to be the least. Corporate bonds carry a higher credit risk than Government Securities and among corporate bonds there are different levels of safety. Credit risks of most issuers of debt securities are rated by independent and professionally run rating agencies. Ratings of Credit issued by these agencies typically range from "AAA" (read as "Triple A" denoting "Highest Safety") to "D" (denoting "Default"). A bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.

- e. **Inflation risk:** Inflation causes tomorrow's currency to be worth less than today's; in other words, it reduces the purchasing power of a bond investor's future interest payments and principal, collectively known as "cash flows." Inflation also leads to higher interest rates, which in turn leads to lower bond prices. Inflation-indexed securities such as Treasury Inflation Protection Securities (TIPS) are structured to remove inflation risk.
- f. **Prepayment Risk:** The borrower may repay the receivables earlier than scheduled, which may result in change in the

yield and tenor for the Scheme.

3. COMMON RISKS ASSOCIATED WITH INVESTING IN FIXED INCOME SECURITIES/BONDS AND EQUITIES AND EQUITY RELATED SECURITIES:

- a. **Counterparty Risk:** This is the risk of failure of counterparty to the transaction to deliver securities against consideration received or to pay consideration against securities delivered, in full or in part or as per the agreed specification. There could be losses to the scheme in case of counterparty default.
- b. **Settlement Risk:** This is the risk of non-delivery or delay of instruments or payment on settlement day. This non-settlement or delay may lead to opportunity losses. The inability of the Scheme to make purchases in intended securities due to settlement problems could cause the Scheme to miss certain investment opportunities. Fixed income securities relatively run higher settlement risk, which can adversely affect the ability of the fund house to swiftly execute trading strategies which can lead to adverse movements in NAV.
- c. **Performance Risk:** Performance of the Scheme may be impacted with changes in factors which affect the capital market and in particular the debt market.
- d. **Selection Risk:** The risk that a security chosen will underperform the market for reasons that cannot be anticipated.
- e. **Timing risk:** The risk that an investor takes when trying to buy or sell a stock based on future price predictions. Timing risk explains the potential for missing out on beneficial movements in price due to an error in timing. This could cause harm to the value of an investor's portfolio because of purchasing too high or selling too low.
- f. **Concentration risk:** This is the risk arising from over exposure to few securities/issuers/sectors.
- g. **Legislative risk:** The risk that a change in the tax code or law could affect the value of taxable or tax-exempt interest income.

4. RISKS ASSOCIATED WITH LISTING OF UNITS ON STOCK EXCHANGE(S):

- a. Although the units of the scheme will be listed on the exchange, there can be no assurance that the active secondary market will develop or be maintained.
- b. Trading in Units of the scheme on the Exchange may be halted because of market conditions or for reasons that in view of Exchange Authorities or SEBI, trading in Units of the scheme is not advisable. In addition, trading in Units of the Scheme is subject to trading halts caused by extraordinary market volatility and pursuant to Exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of Exchange necessary to maintain the listing of Units of the respective Plan(s) will continue to be met or will remain unchanged.
- c. Any changes in trading regulations by the Stock Exchange(s) or SEBI may inter-alia result in wider premium/ discount to NAV.
- d. The Units of the scheme may trade above or below their NAV. The NAV of the scheme will fluctuate with changes in the market value of scheme holdings. The trading prices of Units of the scheme will fluctuate in accordance with changes in their NAV as well as market supply and demand for the Units of the scheme.
- e. The Units will be issued in demat form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund on the maturity date will depend upon the confirmations to be received from depository (ies) on which the Mutual Fund has no control.
- f. The market price of the Units of the scheme like any other listed security is largely dependent on two factors viz., (a) the intrinsic value of the Unit (or NAV) and (b) demand and supply of Units in the market. Sizeable demand or supply of the Units in the Exchange may lead to market price of the Units to quote at premium or discount to NAV.
- g. As the Units allotted under the scheme will be listed on the Exchange, the Mutual Fund shall not provide for redemption / repurchase of Units prior to maturity date of the scheme.

5. RISKS ASSOCIATED WITH CLOSE ENDED SCHEME(S):

Investing in close-ended Schemes is more appropriate for seasoned investors. A close-ended Scheme endeavors to

achieve the desired returns only at the scheduled maturity of the Scheme. Investors who wish to exit/redeem before the scheduled maturity date may do so through the stock exchange mode, if they have opted to hold Units in a demat form, by mentioning their demat details on the NFO application form. For the units listed on the exchange, it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units. Hence, Unit Holders who sell their Units in a Scheme prior to maturity may not get the desired returns.

6. **RISKS ASSOCIATED WITH CLOSE ENDED EQUITY SCHEME(S)**: The Scheme being a close ended equity scheme with fixed investment universe will be affected by the risks associated with equity markets. Equity instruments on account of its volatile nature are subject to price fluctuations on daily basis. The volatility in the value of the equity instruments is due to various micro and macro economic factors affecting the securities markets. This may have adverse impact on individual securities /sector and consequently on the NAV of Scheme. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the schemes portfolio may result, at times, in potential losses to the scheme, should there be a subsequent decline in the value of the securities held in the schemes portfolio.

Maturity risk: Investment decisions made by the scheme may not always be profitable, even though it is intended to generate capital appreciation and maximize the returns by actively investing in equity and equity related securities. Investors therefore will have to accept the returns generated by the scheme at the time of maturity. Maturity returns might also get impacted in case of market downturns. Moreover, given the nature of scheme, the AMC may be required to liquidate the equity portfolio and the proceeds may be kept in cash and invested largely in cash equivalents/money market instruments towards the Maturity of the Scheme and to that extent these investments made may not be in line with the asset allocation pattern and may have bearing on scheme returns.

7. **RISKS ASSOCIATED WITH INVESTING IN UNRATED SECURITIES**: Investing in unrated securities will be riskier compared to investment in rated instruments due to non availability of third party assessment on the repaying capability of the issuer. Any investment in unrated securities will be carried out only after obtaining the general approval from Board of Trustees and Board of AMC. The Mutual Fund will carry out internal rating exercise for all unrated instruments in which the Fund Manger plans to make investments.

B. RISK MANAGEMENT STRATEGIES

LIC Nomura Mutual Fund Asset Management Company Limited (LIC Nomura MF AMC) is committed to a strong control and compliance environment and ensuring that the management structure is appropriate to the scale of the business.

Besides the regulatory guidelines issued by SEBI, the investment management process of the firm adheres to the internal policies on Investment and Risk Management.

1. Risks associated with investment in Equity Investments: The Investment Manager endeavors to invest in companies, where adequate due diligence has been performed by the Investment Manager. As not all these companies are very well researched by third-party research companies, the Investment Manager also relies on its own research. This involves one to one meetings with the management of companies, attending conferences and analyst meets and also tele-conferences. The company-wise analysis will focus, amongst others, on the historical and current financial condition of the company, potential value creation/unlocking of value and its impact on earnings growth, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, product profile, brand equity, market share, competitive edge, research, technological know-how and transparency in corporate governance. Our internal guidelines have maximum active/passive limits per sector and per stock vis-à-vis the benchmark to mitigate excessive risk concentration.

2. Market Liquidity Risk and Liquidity Risk on account of unquoted securities

The liquidity risk will be managed and/or sought to be addressed by creating a portfolio which has adequate access to liquidity.

The equity securities in which the Scheme will invest are companies that are expected to have higher market liquidity and are very well researched by third party research houses. Our internal guidelines have maximum active/passive limits per sector and per stock vis-à-vis the benchmark to mitigate excessive risk concentration.

For fixed income securities, the first access to liquidity is through cash and very short duration securities (including

Collateralised Borrowing & Lending Obligation, also known as CBLO).

3. Credit Risk and Market Risk

The credit risk associated with fixed income securities will be managed by making investments in securities issued by borrowers, which have a very good credit profile. The Risk & Quantitative Analysis team assigns limits for each issuer (other than Government of India); these limits are for the amount as well as maximum permissible tenor for each issuer. The credit process ensures that issuer level review is done at inception as well as periodically by taking into consideration the balance sheet and operating strength of the issuer.

4. Term Structure of Interest Rates (TSIR) Risk

Term Structure of Interest Rates (TSIR) Risk will be managed by making investments for cash management purposes, in very short duration fixed income securities (including Collateralised Borrowing & Lending Obligation, also known as CBLO), which have low probability of negative returns on account of increase in Interest rates.

5. Re-investment Risk

Re-investment Risk is prevalent for fixed income securities, but as the primary investments of the Scheme are short duration in nature, the impact can be expected to be small.

C. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEMES

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the scheme. These conditions will be complied with immediately after the close of the NFO itself i.e. at the time of allotment. In case of non-fulfilment with the condition of minimum 20 investors, the scheme shall be wound up in accordance with Regulation 39 (2) (c) of SEBI (MF) Regulations automatically without any reference from SEBI. In case of non-fulfilment with the condition of 25% holding by a single investor on the date of allotment, the application to the extent of exposure in excess of the stipulated 25% limit would be liable to be rejected and the allotment would be effective only to the extent of 25% of the corpus collected. Consequently, such exposure over 25% limits will lead to refund within 5 Business Days of the date of closure of the New Fund Offer.

D. SPECIAL CONSIDERATION

1. Subject to the SEBI (MF) Regulations, funds managed by the affiliates/associates of the Sponsors may invest either directly or indirectly in the Scheme and may acquire a substantial portion of the Schemes' Units and collectively constitute a majority investor in the Scheme. Accordingly, redemption of Units held by such funds may have an adverse impact on the value of the Units of the Scheme because of the timing of any such redemption and may impact the ability of other Unit Holders to redeem their respective Units.

2. Neither the SID and SAI, nor the Units, have been registered in any jurisdiction. The distribution of this Scheme Information Document in certain jurisdictions may be restricted or subject to registration requirements and, accordingly, persons who come into possession of this SID and the SAI in such jurisdictions are required to inform themselves about, and to observe, any such restrictions. No person receiving a copy of this SID or any accompanying application form in such jurisdiction may treat this SID or such application form as constituting an invitation to them to subscribe for Units, nor should they in any event use any such application form, unless in the relevant jurisdiction such an invitation could lawfully be made to them and such application form could lawfully be used without compliance of any registration or other legal requirements.

3. Investment decisions made by the Investment Manager may not always be profitable.

4. The Mutual Fund/AMC has not authorized any person to give any information or make any representations, either oral or written, not stated in this SID in connection with issue of Units under the Schemes. Prospective investors are advised not to rely upon any information or representations not incorporated in this SID as the same have not been authorized by the Mutual Fund or the AMC. Any subscription, purchase or sale made by any person on the basis of statements or representations which are not contained in this SID or which are inconsistent with the information contained herein shall be solely at the risk of the investor.

5. Suspicious Transaction Reporting: If after due diligence, the AMC believes that any transaction is suspicious in nature as regards money laundering, the AMC shall report such suspicious transactions to competent authorities under PMLA and rules/guidelines issued there under by SEBI and/or RBI, furnish any such information in connection therewith to such authorities and take any other actions as may be required for the purposes of fulfilling its obligations under PMLA and rules/guidelines issued there under by SEBI and/or RBI without obtaining the prior approval of the investor/Unit holder/any other person.

6. The tax benefits described in this Scheme Information Document and Statement of Additional Information are as available under the present taxation laws and are available subject to relevant conditions. The information given is included only for

general purpose and is based on advise received by the AMC regarding the law and practice currently in force in India and the Unit holders should be aware that the relevant fiscal rules or their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Unit holder is advised to consult his/her own professional tax advisor.

7.
