Scheme Risks and Risk Management Strategy:	Risk	Risk Management Strategy
	<b>Price-Risk or Interest-Rate</b> Risk: Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. However, debt securities in this scheme are intended to be held till maturity. For such securities held till maturity, there will not be any interest rate risk at the end of the tenure.	The fund will invest in a basket of debt and money market securities maturing on or before maturity of the fund with a view to hold them till the maturity of the fund. While the interim NAV will fluctuate in response to changes in interest rates, the final NAV will be more stable. To that extent the interest rate risk will be mitigated at the maturity of the scheme.
	<b>Credit Risk:</b> In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government securities, there is no credit risk to that extent. The Scheme is required to secure highest grade credit rating for its portfolio, as per the SEBI regulations for Capital Protection Oriented schemes. The credit rating however does not imply any capital guarantee.	Every investment in Debt and Money Market Instruments of any issuer would be made in accordance with Credit policy as defined and established by AMC from time to time. The Credit Policy, which is reviewed and monitored on a regular basis by Investment Committee, inter alia, enumerates issuer selection process, the various parameters to be considered for setting up credit exposure limits and Credit authorisation matrix for such limits, credit monitoring process etc. he negative list would be bonds of sectors like Real Estate, Retail, Gem and Jewellery etc. In case any new issuer is in the market at the time of our actual investment, AMC shall ensure that the investments are made in instruments which are AAA rated or equivalent for such new entrants
		<ul> <li>AMC reserves the right to alter the list from time to time to the extent the same is deemed fit on the basis of Credit policy, as adopted and in the interest of protecting the capital of the investors.</li> <li>The following parameters shall be considered for selection: <ul> <li>(i) The exposure to a counter party is based on the networth of the counterparty. The fund manager would do a risk assessment of the issuer before making the investments. Further, continuous monitoring of the networth of the company is done. The risk assessment by the fund manager includes the monitoring of the following: <ul> <li>I. Capital Structure</li> <li>II. Debt Service coverage ratio</li> <li>III. Interest coverage</li> <li>IV. Profitability margin</li> <li>V. Current ratio</li> </ul> </li> </ul></li></ul>
	• · · · ·	<ul> <li>(ii) The fund managers determine the sector to which the counter party relates. The fund managers assigns risk weightages to sectors and shall not invest in sectors which carry a high credit risk. The risk weightages are based upon various factors like the nature of products/services of the sector, current state and future outlook for the sector, subsidies provided to the sector and government regulations for the sector.</li> <li>(iii) The fund manager shall also check the track</li> </ul>
		record of the company in terms of its financials and any defaults to its creditors. (iv) The fund managers shall consider the track record of the sponsor/ parent of the counterparty. It includes the financials of the sponsor/ parent company and whether the parent/sponsor has defaulted in the past.
		(v) The fund manager can also have a call with the Management of the company as a part of its research of the company.
		The above parameters are dependent upon the information available at the time of due diligence. The fund manager shall endeavour to include all these parameters but investors should note that these parameters are indicative and can change from time to time at the discretion of the fund manager.
