Investment Strategy:	<p>The Investment Manager will seek capital appreciation by investing in equity and equity related instruments of companies where the long-term growth potential is not fully reflected in the current market price of the company's securities, from the universe S&P BSE 200 Index.</p> <p>Investment Manager seeks to ensure proper risk management through diversification across diverse set of stocks and sectors, and by taking into account key economic trends in the portfolio. In order to identify such investment opportunities, the Investment Manager will conduct analysis of the fundamentals and determine the attractiveness of investment opportunities. Such analysis typically will include, among other things, the historical as well as current financial condition of the company, quality of the management, business prospects, and the valuation relative to its fundamentals.</p> <p>The Investment Manager will invest only in those money market instruments that are rated investment grade by a domestic credit rating agency authorised to carry out such activity, such as CRISIL, ICRA, CARE, etc. or in unrated money market instruments, which the Investment Manager believes to be of equivalent quality. Where investment in unrated money market instruments is sought to be made, the specific approval of the Board of Directors of the AMC and Trustee shall be obtained prior to investment. In-house research by the Investment Manager will emphasize on credit analysis, in order to determine credit risk.</p>																
Risk Profile of the Scheme:	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:</p> <p>The scheme carries risks associated with investing in debt and money market securities, securitized debt etc.</p> <p>Investments in mutual funds units involve investment risks such as trading volumes, settlement risk, liquidity risk and default risk. Trading volume may restrict liquidity. The AMC may choose to invest in unlisted securities which may increase the risk on the portfolio. Also the scheme's investment may be affected by changes in law, policies of the government, taxation and political, economic or other developments.</p> <p>Investment in debt and money market instruments are subject to interest rate risk, re-investment risk, basis risk, credit risk, spread risk, prepayment risk etc.</p>																

Scheme Risks and Risk Management Strategy:	Risk	Risk Management Strategy
	<p>RISKS ASSOCIATED WITH INVESTING IN EQUITIES AND EQUITY RELATED SECURITIES</p> <p>Market risk: Any type of risk due to the market conditions and evolution, such as volatility in the capital markets, interest rates, changes in policies of the Government, taxation laws or any other political and economic development, which all may negatively affect the prices of the securities invested in by the scheme.</p> <p>Business risk: Risk related to uncertainty of income caused by the nature of a company's business and having an impact on price fluctuations.</p> <p>Liquidity risk: This risk pertains to how saleable a security is in the market or the ease at which a security can be sold at or close to its' quoted or published price/value.</p> <p>Securities that are listed on the stock exchange generally carry lower liquidity risk; the ability to sell these investments is limited by the overall trading volume on the stock exchanges.</p>	<p>The Investment Manager endeavors to invest in companies, where adequate due diligence has been performed by the Investment Manager. As not all these companies are very well researched by third-party research companies, the Investment Manager also relies on its own research. This involves one to one meetings with the management of companies, attending conferences and analyst meets and also tele-conferences. The company-wise analysis will focus, amongst others, on the historical and current financial condition of the company, potential value creation/unlocking of value and its impact on earnings growth, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, product profile, brand equity, market share, competitive edge, research, technological know-how and transparency in corporate governance. Our internal guidelines have maximum active/passive limits per sector and per stock vis-à-vis the benchmark to mitigate excessive risk concentration.</p>
	<p>Market Liquidity Risk and Liquidity Risk on account of unquoted Securities:</p> <p>The liquidity of investments made in the Schemes may be restricted by trading volumes, settlement periods and transfer procedures. Although the investment universe constitutes securities which will have high market liquidity, there is a possibility that market liquidity could get impacted on account of company/sector/general market related events and there could be a price impact on account of portfolio rebalancing.</p> <p>Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. There have been times in the past, when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct further transactions. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Schemes are uninvested and no return is earned thereon. The inability of the Schemes to make intended securities purchases, due to settlement problems, could cause the Schemes to miss certain investment opportunities.</p> <p>Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Schemes and may lead to the Schemes incurring losses till the security is finally sold.</p>	<p>The liquidity risk will be managed and/or sought to be addressed by creating a portfolio which has adequate access to liquidity.</p> <p>The equity securities in which the Scheme will invest are companies that are expected to have higher market liquidity and are very well researched by third party research houses. Our internal guidelines have maximum active/passive limits per sector and per stock vis-à-vis the benchmark to mitigate excessive risk concentration.</p> <p>For fixed income securities, the first access to liquidity is through cash and very short duration securities (including Collateralised Borrowing & Lending Obligation, also known as CBLO).</p>
	<p>Term Structure of Interest Rates (TSIR) Risk:</p> <p>The NAV of the Scheme's Units, to the extent that the Scheme is invested in fixed income securities, will be affected by changes in the general level of interest rates. When interest rates decline, the value of a portfolio of fixed income securities can be expected to rise. Conversely, when interest rates rise, the value of a portfolio of fixed income securities can be expected to decline.</p>	<p>Term Structure of Interest Rates (TSIR) Risk will be managed by making investments for cash management purposes, in very short duration fixed income securities (including Collateralised Borrowing & Lending Obligation, also known as CBLO), which have low probability of negative returns on account of increase in interest rates.</p>
	<p>Re-investment Risk: The investments made by the Scheme are subject to reinvestment risk. This risk refers to the interest rate levels at which maturity proceeds & cash flows received from the securities in the Scheme are reinvested. The risk is that the rate at which these cash flows can be reinvested may be lower than that originally assumed. fixed income securities can be expected to decline.</p>	<p>Re-investment Risk is prevalent for fixed income securities, but as the primary investments of the Scheme are short duration in nature, the impact can be expected to be small returns on account of increase in interest rates.</p>
	<p>For detailed risk factors and risk management strategy, Kindly refer to the Scheme Information Document. "The mutual fund or AMC and its empanelled brokers have not given and shall not give any indicative portfolio and indicative yield in any communication, in any manner whatsoever. Investors are advised not to rely on any communication regarding indicative yield/portfolio with regard to the scheme".</p>
